ZETSAW today has developed to a company with approximately one quarter of domestic hand saw market share, and around 5 million pcs. of annual manufacturing capacity. The saws have been well received by Professionals in more than 20 different countries thanks for the high quality without any compromise in the pursuit of perfection.

ZETSAW, as the Originator of the Blade-interchangeable handsaw, also firstly introduced impulse-Hardening treatment on the handsaw teeth has set the world's standard of the modern Handsaw industry today. Furthermore, In-house developed manufacturing line with decade's long non-stop innovation has made us capable of providing customers with handsaws of the highest quality and fully supporting them in their handcraft activities.

In order to safeguard our customers, we have since 2000 been operating the ISO9001/2000 Quality Management System to maintain the high quality of our products.

ZETSAW was established as a local manufacturing company in the heartland of Japanese hardware industry- Miki city in 1943, and naturally inherited the great tradition of handsaw manufacturing while introducing extensive modern technology into the whole saw manufacturing line.
